

Z Skin Repair and Zonase - a patented solution for problem skin

Developed in Norway, Z Skin Repair is a product series with natural ingredients that can be used on damaged skin and that, among other things, breaks down dead skin cells. Z Skin Repair provides a nature-based remedy for problem skin. Experience shows that these products can help with a range of different problems. Z Skin Repair can also soothe and relieve insect bites or sunburned skin.

Z Skin Repair contains only natural ingredients. To the cream base are added a special enzyme, Zonase. We use one quality of the enzyme called Zonase X. Zonase X is a natural substance specially designed to break down the protein structure in the eggshell around salmon offspring, without damaging the salmon embryo or other living cells inside the egg. Zonase X also has the unique ability to distinguish between healthy cells and dead skin cells. Zonase X can, therefore, be used as a remedy that breaks down all forms of dead cells on the skin's surface, without damaging the healthy living cells in the underlying skin. Removal of the dead skin cells stimulates development of new skin. The result is a thicker, smoother and more supple skin. The other ingredients in Z Skin Repair help the process Zonase X starts.

Does all skin tolerate Z Skin Repair? Z Skin Repair consists of only natural ingredients and tests have not shown any allergic reactions to the products. It contains no parabens, perfumes or dyes.

Can Z Skin Repair be used on all kinds of problem skin? There are a many kinds of problem skin. There can, therefore, be no guarantee that Z Skin Repair will relieve them all. What one can say with certainty is that reports from individual users have been very good. Some will, nevertheless, find that Z Skin Repair does not give the desired result. This applies to Z Skin Repair as it does for all other products of this type.

How long does it take? Some notice that it helps after just a couple of days, but we suggest that the cream be used at least two to three weeks. By applying it twice a day for that period, you will get a clear indication if the cream is right for your skin problem.

Z Skin Repair comes in six different variants. If you have great problems with your skin, you normally start with Z Skin Repair Extra Intensive Cream. When the problems are solved, you use Z Skin Repair Kids Sensitive Cream. The creams are applied twice daily, morning and evening, or as needed. For people with especially sensitive skin and children, Z Skin Repair Kids Sensitive Cream may be the best solution.

The Z Skin Repair Series otherwise consists of Z Skin Repair Scalp Lotion Spray, which is used together with Z Skin Repair Shampoo if the scalp needs treatment; Z Skin Repair Hand & Nail Cream helps dry hands and cracked cuticles; while Z Skin Repair Lip Balm can be good for those who are plagued by dry or cracked lips.
