

Z Skin Repair Kids Sensitive Cream is, like the other Z Skin Repair products, improved with the use of Zonase X. Z Skin Repair Kids Sensitive Cream is based on vegetable oils, plus the Norwegian-developed, patented substance, Smids. Smids assures that the cream penetrates down into the skin, providing nourishment and moisture at the same time as it reduces moisture loss from the skin.

In addition to Zonase X and Smids, the cream contains zinc and vitamins A, E, and B5. The cream is made with a balanced blending of ingredients to assure that it safely can be used on a child's delicate skin and other sensitive skin without causing irritation or stinging. The ingredients in Z Skin Repair Kids Sensitive Cream make the skin soft and supple. It is made without parabens, dyes or perfumes.

Z Skin Repair Kids Sensitive Cream is sold in tubes containing 50 ml.
