

Z Skin Repair Lip Balm is the smallest tube in the Z series, but will for many be the biggest news among these products. It helps dry and cracked lips. It is especially useful in connection with winter weather, saltwater, and summer sun.

The active ingredient, Zonase X, breaks down dead skin cells and gives quicker renewal. The balm also contains beta glucan, bee wax, and vitamins A, E and B5. Z Skin Repair Lip Balm can help preserve moisture and softness of the lips, both on the surface and below. Used regularly, it will help prevent your lips from drying and cracking.

Z Skin Repair Lip Balm comes in a convenient 10 ml tube.
